INTERNSHIP WEEKLY REPORT

HOST TRAINING ESTABLISHMENT: Department of Information Technology
Week3: February 19, 2024 – February 23, 2024

STUDENT NAME: LYKA ANN C. CASITA, SHANE YVONNE F. CUNANAN

Number of hours worked for the week: **40 hours**

Total number of hours worked since start of First Week Internship: **112 hours**

A. ACTIVITIES/DUTIES/FUNCTIONS PERFORMED

February 19, 2024

➢ Trainees presented the enhanced wireframe design of Faculty Profile Information System for Admin Interface.

February 20, 2024

➢ Using Canva, trainees continue the creation of improved wireframe design for the Faculty Profile Information System's user interface. They enhanced it by clearly arranging the content to make it easier for users to navigate. They made sure that user could access and interact with the system easily.

February 21, 2024

➢ In their capstone project, the trainees added a filtering feature to the news section. It improves the system's usability by facilitating easier navigation and faster access to the information that users need.

February 22, 2024

➢ After researching different CLSU websites for design ideas, the trainees enhanced the interface design of their capstone project. They added animations, more buttons and images to enhance the user engagement and interaction.

February 23, 2024

➢ Trainees finished the creation of wireframe design of Faculty Profile Information System. After completing the wireframe, trainees have created a clear visual representation of the interface that will direct the next phases of development.

B. KNOWLEDGE GAINED

1. What new learnings were gained during the week?

➢ The trainees learned important concepts and techniques for system development and interface design. They discovered efficient methods for enhancing user interfaces and creating wireframes using Canva. Furthermore, they deepened their comprehension of user experience by incorporating functions like animations and filtering choices to raise system engagement and usability.

2. What skills were developed/enhanced?

➢ Their proficiency in creating visually appealing wireframes and interface layouts using design tools like Canva has improved. They improved their capabilities for organizing content as well, enabling the systems they were working on to have user-friendly navigation.
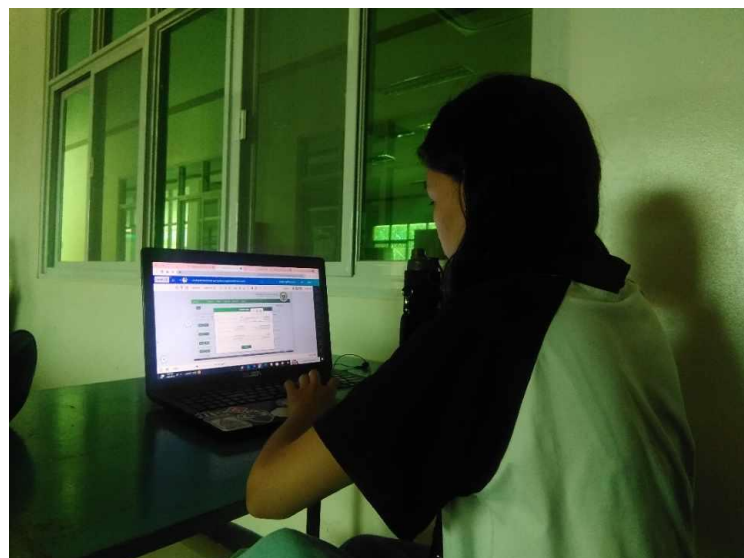

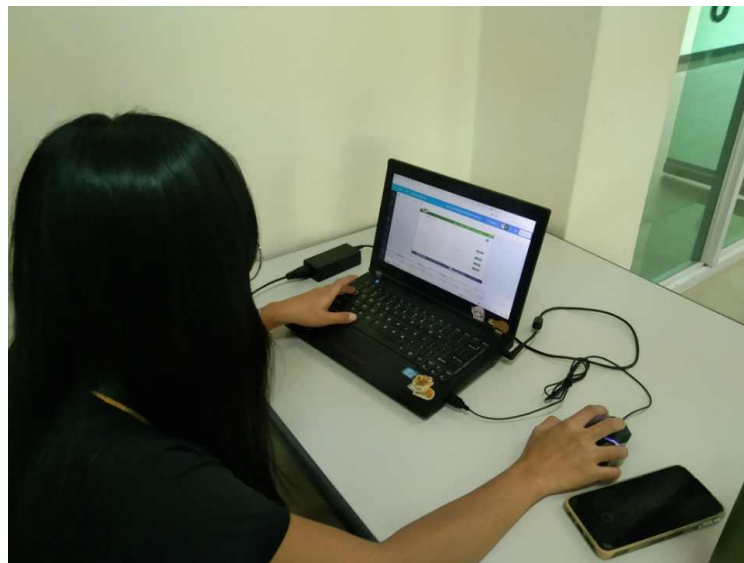

INTERNSHIP WEEKLY REPORT

C. PROBLEMS ENCOUNTERED

1. What problems have you encountered this week?
   - The trainees did not encounter any problem in this week.
2. How did you handle the problem?
   - None

D. PHOTO DOCUMENTATION FOR THIS WEEK OF THE ACTIVITES PERFORMED FOR THE WHOLE WEEK (at least include 2 to 4 pictures of your weekly activity for this week, each picture has label of what you are doing)
